

Northwind Warehouse Field Notes

Rotterdam, week 34.

The pick path for the Brewing aisle was reversed on Tuesday so that the filter cartons sit nearer the packing benches. Pick times for orders containing filters fell from about 90 seconds to about 55.

Two pallets of vacuum canisters arrived with crushed corners. Photographed and logged as damaged on arrival before anything was moved, per the handbook. The carrier claim reference is NW-CLM-4471.

The humidity sensor in the Storage aisle reads about four points high. It has been flagged for replacement; do not act on its readings until it is swapped.

Hamburg reports the electric grinder stock is below its reorder level and a restock has been requested from the supplier.
